SUPERSONIC UNKNOWN DIPA

PROJECT 1794
DOUBLE INDIA PALE ALE SERIES
CAN 2/3

Project 1794 was a secret 1950s U.S. Air Force program aimed at developing a supersonic, saucer-shaped VTOL aircraft to intercept Soviet bombers. The craft was designed to reach speeds of Mach 3 to 4 at high altitudes, featuring a disc-shaped all-wing design powered by a Rolls-Royce jet engine. Ultimately the project never achieved its ambitious goals, falling far short of its performance targets, and was quietly abandoned before a viable aircraft was ever produced... Or was it?

AVAILABLE IN:

CANS: 24/16oz, 6/4 pk DRAFT: 1/2 BBL + 1/6 BBL

**8%
ABV**

Supersonic Unknown is built with American ingenuity, alien technology, and an unreasonable amount of hops. This Double Dry-Hopped Double IPA blasts off with lush notes of orange lollipop, ripe mango, and bright tangerine zest from a heavy dose of Superdelic, Mosaic, and a dash of Sabro hops. Buckle up for this juicy hop machine that's truly out of this world.
